Kei Advisors LLC provides senior level executives of public and pre-IPO companies with a unique and sophisticated methodology, the Pinnacle Value (PV) Process, to help them create optimum shareholder value. We accomplish this by closing the information value gap that often exists between the market's perception of a company's value and the company's strategic competence and operational effectiveness. Kei cultivates management and directors' credibility and relations with investors and analysts while developing for its clients value-enhancing strategies for addressing capital needs. For more information, visit our website at www.keiadvisors.com.

Directors and Management: In Concert or Conflict?

- *Do you find yourself puzzled by the significance of change in the U.S. capital markets since the passage of the Sarbanes-Oxley Act in July of 2002?*
- *Do you need to monitor or operate in the U.S. capital markets?*
- *Have the rules and regulations improved corporate governance?*
- *How do boards cooperate with management while maintaining proper independence?*
- *How do executives keep their Directors involved in governance, not management?*

Join us as we discuss these topics and more, both in formal presentation and panel discussion format.

The panel will include legal counsel, investor relations professionals, directors, corporate executives and outside auditors.
